Note:	Calculation of the time difference in individual events: The start time difference for each athlete is calculated by converting the number of points behind into time. Each point behind is equivalent to four seconds; an athlete 15 points behind will start with a time difference of one minute.
	Wave: To prevent too large start time differences, the Jury can decide upon the use of the "wave start". At the end of the Cross-Country race, the actual time difference after Ski Jumping will be adjusted accordingly.
	Performance: A rating is calculated for the Ski Jumping and Cross-Country elements for each athlete during the World Cup season.
